

# WHITE LIGHTNING SLIP SEAL BONDED PISTON

## WHAT IS IT?

The NOV™ Mission™ White Lightning™ Slip Seal Piston is a multi-durometer, solid bonded urethane piston built to deliver an economical solution to harsh drilling environments.

## PISTON DESIGN:

The piston is manufactured from a highly engineered elastomeric compound. The design of the White Lightning Slip Seal piston, sometimes referred to as “bull nose”, promises ease of assembly when loading into the liner due to the smooth engagement of the piston into the liner bore.

## OPERATING TEMPERATURES:

Capable of operating in fluid temperatures of up to 230°F (110°C) while maintaining superior resistance to tear and extrusion.

## WHY USE IT?

- Economical solution to harsh drilling environments
- High temperature resistance
- Superior resistance to tear and extrusion
- Increased run times even at pressures up to 7500 PSI
