

Shaffer® Type CVX-W Shear Rams

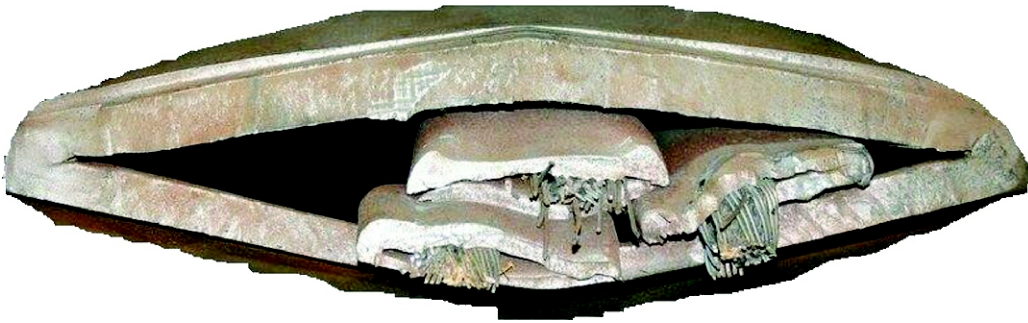

SHEAR AND SEAL ON MULTIPLE STRINGS CONTAINING WIRELINE

The CVX-W Shear Rams have been specifically designed to shear and seal on multiple string configurations. Typically, the multiple string configuration contains drill pipe with two or three coiled tubing strings and wireline inside. (Refer to the photo below of an actual sheared sample).

Extensive verification testing was performed on 6 $\frac{5}{8}$ " S-135 drillpipe and larger diameter shear subs. Testing involved multiple shears with sealing achieved after each shear. CVX-W Shear Rams are currently available for 18" NXT® and SLX BOPs. For additional information, please contact your NOV sales representative.
